## **DETAILED ACTION**

### ***Reasons for Allowance***

1. Claims 22-39 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

Regarding claims 22 and 29, Examiner's newly discovered reference Kipp and the prior art reference Kung fails to teach that both of the first/primary call server and the second/backup call server store connection status and call state information regarding the calls in progress in a media gateway. Kipp teaches that both of the first call processor [i.e., first call server] and the second backup call processor [i.e., backup call server] store connection status and call state information regarding the calls in the SS7 network (col.3, lines 11-40). Kung teaches that the call manager [i.e., first call server] maintains connection status and call state information regarding the calls in progress in a media gateway (col.9, lines 41-44, col.10, lines 9-24, col.26, line 55, col.27, line 2, lines 8-10, 31-49). There is no teaching or motivation in Kipp's invention in combination with Kung's invention to store connection status and call state information regarding the calls in progress in a media gateway in both of the primary call server and back up call server.
